Designed for Pituitary and Skull Base Surgery...

# The Kelly Endonasal Instrument Set

## Microscopic approaches with endoscopic assistance.

When Mizuho partnered with Dr. Kelly\* to develop this innovative, low-profile instrument set, the goal was simple: to create a comprehensive instrument set that afforded easier access, less nasal trauma, and successful tumor removal.

### Kelly Set Advantages

- Slim-line profile that maximizes visibility at the surgical site
- Minimizes trauma for faster healing and less post-operative discomfort
- Comprehensive set saves time with less hassle

US Patent #8,118,739

### Trapezoidal Speculums

- 60 and 70mm lengths and pediatric option available
- Distal flare features a 15 degree upward/downward and outward angle

### Titanium Speculums

- Available in 65, 70, 80, and 90mm lengths
- For use with intraoperative MRI

### Doppler & Probe

- Locate the contralateral carotid artery without injury

### Feather Rotatable Blades

- Maneuverability while under the microscope
- Variety of styles for any type of incision

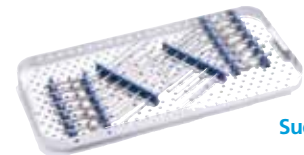

Pistol Grip Micro Scissors

Bayonnetted Chisel & Mallet

Spear-Like Mucosal Dissector

Tapered Suction Tubes

Assorted Cup Forceps

Papavero Speculums

Bipolar Forceps

Ring Curettes & Dissectors

8 MHz Kelly Endonasal Doppler Probe

Kelly Endonasal Suction Tubes
